## DETAILED ACTION

### *Claim Rejections - 35 USC § 101*

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-17 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to a method, process or apparatus for performing time-domain to frequency-domain signal transformation via a mathematical algorithm. The claims are not limited to a practical application of the mathematical algorithm because the composed signal that represents the transformed results is not a tangible result because it is not a real-world result. Also the claimed invention does not physically transform an article or physical object to a different state or thing because the transformation is merely a data transformation.

Relative to applicant's remarks the mere labeling of signal values as pixel values does not provide a practical application.

The claims are also directed to a program per se. While the program contains functionally descriptive material the recording of the functionally descriptive material of some computer-readable medium, which would enable the functionality to be realized, fails to be recited.

Relative to applicant's remarks relative to claim 10 the recitation of computer-readable is not sufficient because paragraph 23 (amended) in the specification does not limit the computer-

readable medium to storage/recordable medium as opposed to a transmission/communication medium.

***Claim Rejections - 35 USC § 112***

2. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 1-3 do not define “a pixel value” and line 12 does not define “the pixel value”. Furthermore “the pixel value” is defined in two inconsistent ways. Similarly note claim 9. Claim 12 clearly fails to recite a sequence of steps because the relationship between and the mixing of the steps of claims 1 and 11 is not at all clear.

***Conclusion***

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
